FOR IMMEDIATE RELEASE

Industrial Duty Cylinder Cart and Rack System Offers Transport and Storage Solutions for the most Demanding Environments

St. Louis, Missouri - - December 12, 2008 – Designed to perform in the most demanding of environments, Responsive Respiratory's new Industrial Cart and Rack Systems offer a versatile solution for cylinder storage and transport.

Engineered to be adaptable to user needs, Responsive Respiratory's Industrial Duty Carts and Racks are pre-fitted with caster/bolt-down plates and are predrilled for stackability. All units also feature integral door hinges to attach latching steel doors, a must for DOT compliant cylinder transport. "We designed our carts and racks with the customer in mind. Their needs are not static; a stationary rack today may need to be mobile next week. The Industrial Duty line offers a flexible system approach so customers can upgrade their existing assets as needed, a feature not available elsewhere in the market," notes Tom Bannon, President. "We're offering a cost-effective solution designed for the changing needs of the customer."

In stock and ready to ship, Responsive Respiratory is the only manufacturer that stocks a full inventory to ensure top service for customers. "The last thing a customer wants is to order a cart or rack and then wait 3+ weeks," explains Bannon, "we stock our complete line and ship same-day. Servicing our customers with a high quality product and fast delivery is our priority."

About Responsive Respiratory - - Responsive Respiratory was founded in 2002 and is dedicated to providing consumers with high quality respiratory products for the home health care and hospital markets.
