FOR IMMEDIATE RELEASE

Responsive Respiratory Expands Pediatric Offering with the Introduction of Animated Pediatric Bi-Flow Mask

St. Louis, Missouri – July 15, 2009 – Responsive Respiratory adds new Pediatric Bi-Flow Mask to oxygen disposable offering.

The Pediatric Bi-Flow Mask is ideal for children unable to tolerate cannulas and features a comfortable fit and animated design to reduce apprehension. The Bi-Flow Mask is unique from typical oxygen masks and cannulas, as it fits gently under the patient's nose, reducing the irritation frequently experienced when using a nasal cannula or full face oxygen mask.

"The animated design is ideal for small children because it helps to comfort them while delivering effective oxygen therapy," stated Tom Bannon, RRI President. "The rabbit nose design reduces the child's apprehension about using the device; the mask delivers the oxygen without irritation, as the cup creates a reservoir that gently directs the oxygen into the child's nose."

The Pediatric Bi-Flow Mask compliments Responsive Respiratory's full line of pediatric oxygen solutions including regulators, nebulizers, and cannulas.

About Responsive Respiratory - - Responsive Respiratory was founded in 2002 and is dedicated to providing consumers with high quality respiratory products for the home health care and hospital markets.
