## FOR IMMEDIATE RELEASE

### Responsive Respiratory Introduces View O2™ Fingertip Pulse Oximeter

St. Louis, Missouri – May 29, 2009 – Responsive Respiratory expands its product line with the View O2™ High Definition Fingertip Pulse Oximeter, providing accurate and dependable measurements of oxygen saturation levels and pulse rates.

A cost-effective and easy to use device, the View O2 Fingertip Pulse Oximeter features an exclusive high-definition color viewing screen with 10 brightness settings that provide a crisp, high-contrast display. The multi-directional readout screen provides large, easy to read numeric pulse rate values, SpO2 readings, and a SpO2 waveform for at-a-glance monitoring. The numerical SPO2, pulse rate and Plethysmogram display is designed to rotate directionally, allowing the caregiver to easily view the results without additional movement by the patient.

“Responsive did a significant amount of end-user research prior to launching the View O2,” states Tom Bannon, RRI President. “We reviewed the common complaints related to the use of pulse oximeters and engineered our model to remove those issues. RRI’s model features a large full color, high-definition rotating screen to ensure accurate readings and to remove the ‘arm twisting’ when viewing the readout.”

The View O2 Pulse Oximeter features a point of purchase display box that makes the unit ideal for walk-in traffic at Provider locations. “The trend in the healthcare market today, especially with the Medicare reimbursement cuts, is store-front displays to increase walk-in traffic for cash sales,” notes Bannon. “Providers looking for alternate sources of revenue – the View O2 Pulse Oximeter is the perfect add-on cash sale product.”

The View O2 Pulse Oximeter complements Responsive Respiratory’s full line of oxygen delivery, monitoring and storage solutions.

About Responsive Respiratory - - Responsive Respiratory was founded in 2002 and is dedicated to providing consumers with high quality respiratory products for the home health care and hospital markets.
